Course sequence recommendations:

No prerequisites are suggested in the description of our graduate courses to make sure the graduate program has the flexibility of catering to all graduate students (that come from a spectrum of educational and cultural backgrounds). The following list is prepared to guide students on what material is needed as background knowledge for successful completion of each graduate level course. Note: It is not expected students will enroll in the courses required for background knowledge, but it is expected students have a broad understanding of the material covered in these courses.
